This project is funded under the *eContentplus* programme¹,
a multiannual Community programme to make digital content in Europe more accessible, usable and exploitable.

¹ OJ L 79, 24.3.2005, p. 1.

1 BHL-Europe Newsletter

The first number of the BHL-Europe Newsletter was prepared in the following structure: Editorial – News – Meetings – Focus – Articles. The first number has 28 pages, provides information about the BHL-Europe project provides information about the BHL-Europe project and gives an extensive overview of all the partner institutions within the project. Furthermore there are articles about BHL, digitisation in the Natural History Museum, London and the National Museum, Prague. All newsletter issue will be uploaded to the newly designed BHL-Europe project Web site for online access and archiving purposes. The BHL-Europe newsletter is directed to the general public and scientific community. It is attached to this document as Annex.

The newsletter will be published quarterly and will have a similar structure in every edition. Articles are provided by BHL-Europe partners and by members of related projects.

2 BHL-Europe Mailing List

The BHL-Europe mailing list will be used for communication and distribution of the BHL-Europe Newsletter. This mailing list has been formed by informing people from existing mailing lists of other projects, such as Edit and BHL, about the BHL-Europe project and asking them if they are interested in the project. If so, they were added to the BHL-Europe mailing list. Today our mailing list consists of 85 e-mail addresses containing institutions and persons mainly from Europe, but also from other continents. We plan to grow our database receiving more readers through our website (see <http://www.bhl-europe.eu/newsletter.php>) and other dissemination activities.
