

BHL-Europe Meeting, Berlin

22 – 25 Feb 2010

Day 3: WP3 (Day 1)

24 February 2010

July conversation

- What do we have now
- What do we want to have in 3-5 years time
- Who can take on each piece
 - BHL-E can do data management & preservation, someone else do GRIB

D3.4 & D3.5

- What are metrics?
 - Would like to move towards functional & user requirements, not implementation
- What is needed?
- Would like to align with larger goals, but may have to focus on “quick & dirty”
- There is a solution to deliver for the prototype, and a global vision for sustainability

Walter – spent time equivalent of 300 euro to look up Darwin’s Descent of Man in BHL, IA, LibraryThing, OpenLibrary. Could have bought book in antiquities shop for 150 euros

Data quality issues need to be defined by user meeting in Vienna in March.

- What are requirements?
- What do partners have?
- What do users need?
- Who are drivers?
 - Europeana only or others?

BHLE next steps:

- <https://bhl.wikispaces.com/List+of+requirements+for+WP3+%28M9+%3E+M18%29>
- <https://bhl.wikispaces.com/D3.5>

Action Items

- BHL-US to develop a MARC export for API from BHL enhanced metadata in time for AIT to send to Europeana
- Make Nancy aware of IPR/licensing issues of Dismarc components
 - Ensure that AIT code can be used as Fair Use within BHL members
