Mar 28, 2011

These external storage drives are used for study and review of digitized scientific literature. The digital files contained on these drives represent public domain books that have been scanned by members of the Biodiversity Heritage Library (BHL), an international consortium of natural history libraries. The files are provided to users free of charge and without restrictions for use at <http://www.biodiversitylibrary.org>.

These drives contain backup copies of the digital files stored by BHL and are being used to transmit the files between international partners. **These drives are to be considered scientific instruments used for scholarly research and have a commercial value of \$0.00 USD.**

**Inquiries concerning the contents of these drives can be made to:**

Chris Freeland  
Technical Director, Biodiversity Heritage Library  
Missouri Botanical Garden  
4344 Shaw Blvd.
