

Overall Feedback from Workshop Participants on what has been implemented so far:-

Heimo - Requirements and descriptions have differed slightly; Search functionality is good and keeping TI aspect separate is a good thing too.

Most participants/Jiri - would like to keep the search function within Bookreader.

Francisco - happy with work so far.

Jana feedback - Good!

Dennis Feedback – Good!

User view - very good! Alphabetical search - good and would also like Google search for users which is also a good option.

Conclusion: Feedback is generally good overall. Hence testing effort will not be so large...we can concentrate more on bugs and not so much on whether it's a feature or not.
