

Sept. 11-13 2007
Missouri Botanical Garden
St Louis, Missouri

Technical
discussions were held to verbally document the logistical and practical technicalities which are being addressed as the Biodiversity Heritage Library comes online.

Active
discussions took place on the meaning of 10 international libraries making available online the world's foundation of scientific literature, redefined through cutting edge taxonomic tools.

Working
teams formed to complete work on "Action Items": architecture, governance, BHL-IA workflow, serials picklist, permissions, rights, collection analysis, BHL portal, funding proposals, OCR, and future meetings.
